## **REPORT ON WORLD WATER DAY**

The World Water Day celebration was organized by the Karupa Foundation, Centre of Sustainable Development Goals, and KAHE on 22<sup>nd</sup> March 2023, entitled "POSTER MAKING CONTEST." Celebrating World Water Day is creating awareness about Clean water, sanitation & conservation. The contest is organized online to promote G20 Sustainable Development Goal 6. And to share the ideas of the youth.

"Accelerating Change" will be the focus of World Water Day in 2023, aiming to accelerate the change necessary to resolve water and sanitation problems. The theme emphasizes how critical it is for people to meet their day-to-day requirements with efficient use of water. Regarding the many resources available, the most precious item is water. But today, a deficiency in accessible water presents a significant threat to the world. This year, the subject that our school has chosen to focus on is "Do not waste water." The KFM was supposed to become more conscious of the water issue that is occurring all across the globe thanks to this program. According to recent surveys, just 20% of the world's spent water gets recycled. The current water crisis might be alleviated if water were recycled. Clean Water and Sanitation is an initiative that emphasizes increasing the availability of water and sanitation for everyone while promoting the sustainable management of these resources. Billion people still do not have access to clean drinking water, sanitation, and hygiene. Around 50 posters were received; a few selected posters are as follows.

## CLEAN WATER AND SANITATION

**GOAL 6: CLEAN WATER AND SANITATION**  
 WE MUST PROTECT EVERY DROP OF WATER

**Save every drop!**

**Our World Depends On It**

**HEALTH PROTOCOLS**

**MAKE THIS PLANET GREENER TO LIVE A LIFE CLEANER**

Wash your hands  
 Use soap  
 Wash your hands  
 Use sanitizer  
 Disinfect  
 Change clothes  
 Wash your face
